- 📍 Lahore, Pakistan

👤 PROFILE

Currently building practical expertise in GoHighLevel through hands-on, self-directed projects covering workflow automation, CRM contact management, form-to-lead capture, email/SMS sequencing, tagging & segmentation, and pipeline/opportunity tracking. Strong understanding of trigger-action automation logic, conditional branching (if/else), and CRM data flow (contact lifecycle from lead capture to sales stage). Actively expanding skills toward funnel building, API/webhook integrations, and third-party automation tools (Zapier, Make, n8n). Comfortable taking a task from concept to working implementation independently.

💼 PROFESSIONAL EXPERIENCE

Python Developer Intern
Enigmatix | June 2025 – Aug 2025

- Developed backend services and REST APIs using Python, Django, FastAPI, and PostgreSQL.
- Designed database schemas and optimized queries for scalable backend performance.
- Tested and documented production APIs using Postman and automated test suites.
- Built RAG chatbot features using LangChain, vector databases, and prompt engineering.

⚙️ SKILLS

Backend Development

Python, FastAPI, Flask, Django, Node.js, Backend Architecture

Frontend Development

React.js, Next.js, TypeScript, HTML5, CSS3, TailwindCSS

Databases

PostgreSQL, MongoDB, Redis, SQLite, Supabase

Integrations & APIs

REST APIs, Webhooks, Twilio, Google Workspace APIs, Third-Party API Integrations

AI & Automation

n8n, Make, LangChain, AI Agents, RAG, Prompt Engineering, LLM Integration, MCP

PROJECTS

[Recruite-AI](#)

AI-Powered Recruitment Screening Platform

- Built an AI-powered recruitment platform for automated candidate screening and job-fit assessment.
- Integrated OpenAI to compare candidate CVs against job requirements and generate structured recommendations.
- Designed n8n workflows with webhooks, parsing, validation, chat-model processing, and callback automation.
- Developed the platform using React, TypeScript, Supabase, PostgreSQL, and Tailwind CSS.

Tech Stack: TypeScript, React, Tailwind CSS, OpenAI API, Supabase, PostgreSQL, n8n

[Voice AI Receptionist](#)

Appointment Automation System

- Built an AI-powered voice receptionist to handle inbound customer calls, FAQs, and lead interactions.
- Automated customer information collection, lead qualification, appointment scheduling, and follow-ups.
- Integrated Voice AI with GoHighLevel CRM, contacts, calendars, and workflow automation.
- Designed automated communication workflows to reduce missed calls and improve appointment conversion.

Tech Stack: GoHighLevel, Voice AI, Conversational AI, CRM, Workflow Automation, Calendar Integration

[Task Management System](#)

Task & Project Management Platform

- Architected a full-stack project platform for centralized task and team management.
- Implemented authentication, role-based access, attendance, and timesheet tracking.
- Developed leave management, notifications, payments, and admin dashboard features.
- Designed scalable backend services for project and organizational operations.

Tech Stack: FastAPI, React, PostgreSQL, Pydantic, CSS

EDUCATION

Bachelor of Science in Artificial Intelligence

2021 - 2025

The Islamia University of Bahawalpur

- Specialized in machine learning, NLP, generative AI, and intelligent system development.
- Developed a JARVIS desktop assistant for voice-controlled Windows task automation.
- Built AI projects using Python, REST APIs, workflow automation, and LLM integrations.

Intermediate in Science

2018 - 2020

Punjab College, Bahawalpur Campus
